May 5, 2008

Agency for Toxic Substances and Disease Registry
U.S. Department of Health and Human Services

Dear Sir or Ma'am,

I note with some concern that the Draft 2008 report

Selected

Information on

Chemical Releases

Within Great Lakes

Counties

Containing Areas

of Concern

excludes any information pertaining to the binational Areas of Concern. I am a member of the St. Clair River Binational Public Advisory Council, and we fully recognize that the impairments in the St. Clair River are bi-national in scope and that chemical releases from both countries impact the health of the river.

I request that the report be expanded to include data for the St. Clair River, Detroit River, and St. Marys River Areas of Concern.

Sincerely,

Patty Troy

St. Clair River Binational Public Advisory Council

Dear Sir or Ma'am,

I would like to reiterate Ms. Troy's concern regarding the Draft 2008 report *Selected Information on Chemical Releases Within Great Lakes Counties Containing Areas of Concern*, which excludes any information pertaining to the binational Areas of Concern.

Please be advised that Ms. Troy's request that the report be expanded to include data for the St. Clair River, Detroit River, and St. Marys River Areas of Concern will no doubt turn into a formal request by our membership at our next scheduled meeting.
