WHITE PHOSPHORUS 189

7. REGULATIONS AND ADVISORIES

International, national, and state regulations and guidelines pertinent to human exposure to white phosphorus are summarized in Table 7-1. No regulations or guidelines for white phosphorus smoke were identified.

A chronic oral reference dose (RfD) of 0.00002 mg/kg/day has been derived and verified by EPA for white phosphorus (IRIS 1993). The RfD is based on a NOAEL of 0.015 mg/kg/day for parturition mortality and forelimb hair loss in rats gavaged with 0.015 mg/kg/day in a one-generation reproduction study (Condray 1985).

ACGIH = American Conference of Governmental Industrial Hygienists; EPA = Environmental Protection Agency; NIOSH = National Institute for Occupational Safety and Health; OERR = Office of Emergency and Remedial Response; OPP = Office of Pesticide Programs; OSHA = Occupational Safety and Health Administration; OSW = Office of Solid Waste; OTS = Office of Toxic Substances; PEL = Permissible Exposure Limit; REL = Recommended Exposure Limit; RfD = Reference Dose; TLV = Threshold Limit Value; TPQ = Threshold Planning Quantity; TWA = Time-Weighted Average

Note 1: Total phosphorus as P shall be limited to the extent necessary to prevent nuisance growth of algae, weeds, and slimes that result in a violation of the water quality criteria. Phosphorus discharges shall not exceed a daily average of one milligram per liter as total P, or stricter requirements imposed by Ohio Environmental Protection Agency.

bList "C" reregistration status: Case #3111, Awaiting data/data in review. Reregistration is supported.

^cA solid waste containing yellow and white phosphorus may become characterized as a hazardous waste when subjected to testing for reactivity as stipulated in 40 CFR 261.23 and, if so characterized, must be managed as a hazardous waste (40 CFR 261.23 [7/1/90]). ^dGroup D = Not classifiable as to carcinogenicity in humans
