

Toxicological Profile for Bis(2-Chloroethyl)Ether (BCEE)

October 2017

U.S. Department of Health and Human Services
Agency for Toxic Substances and Disease Registry

FOREWORD

This toxicological profile is prepared in accordance with guidelines* developed by the Agency for Toxic Substances and Disease Registry (ATSDR) and the Environmental Protection Agency (EPA). The original guidelines were published in the *Federal Register* on April 17, 1987. Each profile will be revised and republished as necessary.

The ATSDR toxicological profile succinctly characterizes the toxicologic and adverse health effects information for these toxic substances described therein. Each peer-reviewed profile identifies and reviews the key literature that describes a substance's toxicologic properties. Other pertinent literature is also presented, but is described in less detail than the key studies. The profile is not intended to be an exhaustive document; however, more comprehensive sources of specialty information are referenced.

The focus of the profiles is on health and toxicologic information; therefore, each toxicological profile begins with a relevance to public health discussion which would allow a public health professional to make a real-time determination of whether the presence of a particular substance in the environment poses a potential threat to human health. The adequacy of information to determine a substance's health effects is described in a health effects summary. Data needs that are of significance to the protection of public health are identified by ATSDR.

Each profile includes the following:

- (A) The examination, summary, and interpretation of available toxicologic information and epidemiologic evaluations on a toxic substance to ascertain the levels of significant human exposure for the substance due to associated acute, intermediate, and chronic exposures;
- (B) A determination of whether adequate information on the health effects of each substance is available or in the process of development to determine levels of exposure that present a significant risk to human health of acute, intermediate, and chronic health effects; and
- (C) Where appropriate, identification of toxicologic testing needed to identify the types or levels of exposure that may present significant risk of adverse health effects in humans.

The principal audiences for the toxicological profiles are health professionals at the Federal, State, and local levels; interested private sector organizations and groups; and members of the public.

This profile reflects ATSDR's assessment of all relevant toxicologic testing and information that has been peer-reviewed. Staffs of the Centers for Disease Control and Prevention and other Federal scientists have also reviewed the profile. In addition, this profile has been peer-reviewed by a nongovernmental panel and was made available for public review. Final responsibility for the contents and views expressed in this toxicological profile resides with ATSDR.

***Legislative Background**

The toxicological profiles are developed under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended (CERCLA or Superfund). CERCLA section 104(i)(1) directs the Administrator of ATSDR to "...effectuate and implement the health related authorities" of the statute. This includes the preparation of toxicological profiles for hazardous substances most commonly found at facilities on the CERCLA National Priorities List (NPL) and that pose the most significant potential threat to human health, as determined by ATSDR and the EPA. Section 104(i)(3) of CERCLA, as amended, directs the Administrator of ATSDR to prepare a toxicological profile for each substance on the list. In addition, ATSDR has the authority to prepare toxicological profiles for substances not found at sites on the NPL, in an effort to "...establish and maintain inventory of literature, research, and studies on the health effects of toxic substances" under CERCLA Section 104(i)(1)(B), to respond to requests for consultation under section 104(i)(4), and as otherwise necessary to support the site-specific response actions conducted by ATSDR.

VERSION HISTORY

Date	Description
December 1989	Final toxicological profile released
July 2009	Addendum to the toxicological profile released
October 2017	Update of data in Chapters 2, 3, and 7

APPENDICES	
APPENDIX A. ATSDR MINIMAL RISK LEVELS AND WORKSHEETS.....	A-1
APPENDIX B. LITERATURE SEARCH FRAMEWORK FOR BIS(2 CHLOROETHYL)ETHER....	B-1
APPENDIX C. USER'S GUIDE.....	C-1
APPENDIX D. QUICK REFERENCE FOR HEALTH CARE PROVIDERS.....	D-1
APPENDIX E. GLOSSARY.....	E-1
APPENDIX F. ACRONYMS, ABBREVIATIONS, AND SYMBOLS.....	F-1

LIST OF FIGURES

1-1. Health Effects Found in Animals Following Inhalation Exposure to Bis(2-Chloroethyl)Ether.....	3
1-2. Summary of Sensitive Targets of Bis(2-Chloroethyl)Ether -- Inhalation.....	5
2-1. Overview of the Number of Studies Examining Bis(2-Chloroethyl)Ether Health Effects.....	9
2-2. Levels of Significant Exposure to BCEE – Inhalation	12
2-3. Levels of Significant Exposure to BCEE - Oral	15
3-1. Summary of Bis(2-Chloroethyl)Ether Metabolism in Rats	25
5-1. Number of NPL Sites with Bis(2-Chloroethyl)Ether Contamination.....	31
6-1. Summary of Existing Health Effects Studies on Bis(2-Chloroethyl)Ether By Route and Endpoint.....	41

LIST OF TABLES

1-1. Minimal Risk Levels (MRLs) for Bis(2-Chloroethyl)Ether	6
2-1. Levels of Significant Exposure to Bis(2-Chloroethyl)Ether – Inhalation	10
2-2. Levels of Significant Exposure to Bis(2-Chloroethyl)Ether – Oral.....	14
2-3. Levels of Significant Exposure to Bis(2-Chloroethyl)Ether – Dermal.....	17
2-4. Genotoxicity of Bis(2-Chloroethyl)Ether In Vivo.....	22
2-5. Genotoxicity of Bis(2-Chloroethyl)Ether In Vitro	23
4-1. Chemical Identity of Bis(2-Chloroethyl)Ether	29
4-2. Physical and Chemical Properties of Bis(2-Chloroethyl)Ether	29
5-1. Facilities that Produce, Process, or Use Bis(2-Chloroethyl)Ether.....	32
5-2. Releases to the Environment from Facilities that Produce, Process, or Use Bis(2-Chloroethyl) Ether.....	34
5-3. Lowest Limit of Detection Based on Standards	37
5-4. Summary of Environmental Levels of Bis(2-Chloroethyl)Ether.....	37
5-5. Bis(2-Chloroethyl)Ether Levels in Water, Soil, and Air of National Priorities List (NPL) Sites	38
7-1. Regulations and Guidelines Applicable to Bis(2-chloroethyl)Ether	47
