PENTACHLOROPHENOL ii

#### **FOREWORD**

This toxicological profile is prepared in accordance with guidelines\* developed by the Agency for Toxic Substances and Disease Registry (ATSDR) and the Environmental Protection Agency (EPA). The original guidelines were published in the *Federal Register* on April 17, 1987. Each profile will be revised and republished as necessary.

The ATSDR toxicological profile succinctly characterizes the toxicologic and adverse health effects information for these toxic substances described therein. Each peer-reviewed profile identifies and reviews the key literature that describes a substance's toxicologic properties. Other pertinent literature is also presented, but is described in less detail than the key studies. The profile is not intended to be an exhaustive document; however, more comprehensive sources of specialty information are referenced.

The focus of the profiles is on health and toxicologic information; therefore, each toxicological profile begins with a relevance to public health discussion which would allow a public health professional to make a real-time determination of whether the presence of a particular substance in the environment poses a potential threat to human health. The adequacy of information to determine a substance's health effects is described in a health effects summary. Data needs that are of significance to the protection of public health are identified by ATSDR.

Each profile includes the following:

- (A) The examination, summary, and interpretation of available toxicologic information and epidemiologic evaluations on a toxic substance to ascertain the levels of significant human exposure for the substance due to associated acute, intermediate, and chronic exposures;
- (B) A determination of whether adequate information on the health effects of each substance is available or in the process of development to determine levels of exposure that present a significant risk to human health of acute, intermediate, and chronic health effects; and
- (C) Where appropriate, identification of toxicologic testing needed to identify the types or levels of exposure that may present significant risk of adverse health effects in humans.

The principal audiences for the toxicological profiles are health professionals at the Federal, State, and local levels; interested private sector organizations and groups; and members of the public.

This profile reflects ATSDR's assessment of all relevant toxicologic testing and information that has been peer-reviewed. Staffs of the Centers for Disease Control and Prevention and other Federal scientists have also reviewed the profile. In addition, this profile has been peer-reviewed by a nongovernmental panel and was made available for public review. Final responsibility for the contents and views expressed in this toxicological profile resides with ATSDR.

## \*Legislative Background

The toxicological profiles are developed under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended (CERCLA or Superfund). CERCLA section 104(i)(1) directs the Administrator of ATSDR to "...effectuate and implement the health related authorities" of the statute. This includes the preparation of toxicological profiles for hazardous substances most commonly found at facilities on the CERCLA National Priorities List (NPL) and that pose the most significant potential threat to human health, as determined by ATSDR and the EPA. Section 104(i)(3) of CERCLA, as amended, directs the Administrator of ATSDR to prepare a toxicological profile for each substance on the list. In addition, ATSDR has the authority to prepare toxicological profiles for substances not found at sites on the NPL, in an effort to "...establish and maintain inventory of literature, research, and studies on the health effects of toxic substances" under CERCLA Section 104(i)(1)(B), to respond to requests for consultation under section 104(i)(4), and as otherwise necessary to support the site-specific response actions conducted by ATSDR.

PENTACHLOROPHENOL

# **VERSION HISTORY**

Date	Description
April 2022	Final toxicological profile released
July 2021	Toxicological profile released for public comment
August 2012	Addendum to toxicological profile released
September 2001	Final toxicological profile released
October 1994	Final toxicological profile released

PENTACHLOROPHENOL v

## **CONTRIBUTORS & REVIEWERS**

## **CHEMICAL MANAGER TEAM**

Obaid Faroon, D.V.M., Ph.D. (Lead) Custodio Muianga, M.P.H., Ph.D.

ATSDR, Office of Innovation and Analytics, Toxicology Section, Atlanta, GA

Lisa Ingerman, Ph.D., D.A.B.T. Mario Citra, Ph.D. Jenny Crisman, B.S. Deborah Herber, Ph.D. Kim Zaccaria, Ph.D., D.A.B.T.

#### **REVIEWERS**

## **Interagency Minimal Risk Level Workgroup:**

Includes ATSDR; National Center for Environmental Health (NCEH); National Institute for Occupational Safety and Health (NIOSH); U.S. Environmental Protection Agency (EPA); National Toxicology Program (NTP).

## Additional reviews for science and/or policy:

ATSDR, Office of Community Health and Hazard Assessment; ATSDR, Office of Capacity Development and Applied Prevention Science; ATSDR, Office of Science; NCEH, Division of Laboratory Science; NCEH, Division of Environmental Health Science and Practice; EPA.

## PEER REVIEWERS

- 1. Alan M. Hoberman, Ph.D., DABT, Fellow ATS Executive Director, Global Developmental Reproductive and Juvenile Toxicology, Horsham, Pennsylvania
- 2. Paul A. Demers, Ph.D., Director, Occupational Cancer Research Centre, Ontario Health Professor, Dalla Lana School of Public Health, University of Toronto, Toronto, Ontario
- 3. Kathryn Guyton, Ph.D., DABT, Scientist, Monographs Group, International Agency for Research on Cancer, France

These experts collectively have knowledge of toxicology, chemistry, and/or health effects. All reviewers were selected in conformity with Section 104(I)(13) of the Comprehensive Environmental Response, Compensation, and Liability Act, as amended.

ATSDR scientists review peer reviewers' comments and determine whether changes will be made to the profile based on comments. The peer reviewers' comments and responses to these comments are part of the administrative record for this compound.

The listing of peer reviewers should not be understood to imply their approval of the profile's final content. The responsibility for the content of this profile lies with ATSDR.

PENTACHLOROPHENOL is

# **LIST OF FIGURES**

1-1.	Health Effects Found in Animals Following Oral Exposure to Pentachlorophenol	3
1-2.	Summary of Sensitive Targets of Pentachlorophenol – Oral	5
2-1.	Overview of the Number of Studies Examining Pentachlorophenol Health Effects	11
3-1.	Proposed Metabolic Scheme for Pentachlorophenol	82
5-1.	Number of NPL Sites with Pentachlorophenol Contamination	95
6-1.	Summary of Existing Health Effects Studies on Pentachlorophenol by Route and Endpoint	.130

PENTACHLOROPHENOL

# **LIST OF TABLES**

1-1.	Minimal Risk Levels (MRLs) for Pentachlorophenol	6
2-1.	Analysis of Impurities Present in Pentachlorophenol Used in NTP (1989) Studies	9
2-2.	Levels of Significant Exposure to Pentachlorophenol – Oral	12
2-3.	Summary of Select Epidemiological Studies Evaluating Possible Associations Between Cancer Outcomes and Pentachlorophenol	60
2-4.	Relative Risks for Cancer in Sawmill Workers Dermally Exposed to Pentachlorophenol	66
2-5.	Genotoxicity of Pentachlorophenol In Vivo	70
2-6.	Genotoxicity of Pentachlorophenol In Vitro.	70
4-1.	Chemical Identity of Pentachlorophenol	93
4-2.	Physical and Chemical Properties of Pentachlorophenol	94
5-1.	Manufacturing Information of Pentachlorophenol-Containing Products	97
5-2.	Facilities that Produce, Process, or Use Pentachlorophenol	97
5-3.	Releases to the Environment from Facilities that Produce, Process, or Use Pentachlorophenol	. 100
5-4.	Lowest Limit of Detection Based on Standards	.113
5-5.	Summary of Environmental Levels of Pentachlorophenol	.113
5-6.	Pentachlorophenol Levels in Water, Soil, and Air of National Priorities List (NPL) Sites	.113
5-7.	Urinary Pentachlorophenol Levels in the NHANES U.S. Population	.121
5-8.	Urinary Pentachlorophenol Levels in the NHANES U.S. Population (Creatinine Corrected)	.122
6-1.	Ongoing Studies on Pentachlorophenol	. 138
7-1.	Regulations and Guidelines Applicable to Pentachlorophenol	. 139
